

# **A630 Parkway Widening**

*You may be aware that the above scheme received approval last month from the Department for Transport. I am writing to you following an undertaking given to residents at information events last year attended by senior officers of the Council and representatives of Balfour Beatty the principal contractor, to keep you up to date with progress as the scheme moves forward.*

*The Council is currently finalising arrangements to commence construction work. Once the details of the construction elements of the project have been confirmed I will be able to share details of the programme with you.*

*Currently I expect the works to mobilise in January 2021 with initial site set up and traffic management arrangements prior to the main works getting underway at the end of that month. The project is expected to complete on site by Autumn 2022.*

*In addition, you will receive further updates from both the Council and the contractor throughout the project together with further contact details for both parties. In addition a construction project website is also planned which will serve as a reference point for progress on-site along with a range of project related information. The Council will be issuing media updates as and when key stages of the project are delivered.*

*We look forward to delivering this project successfully and wish to reassure you that at all times, the project delivery team will be ensuring the least possible disruption to you and your families during the construction period. If you require further information, please contact the relevant parties once the above-mentioned contact information is provided.*

*David Phillips*
